

Reporting non-IBM certifications

The APA or the employee may also report non-IBM certifications. To do this, you will again need to update the employee profile which contains entry capability for non-IBM certifications. One or more non-IBM certifications may be entered at a time. Each non-IBM certification will require documentation to be mailed to IBM in order to verify achievement.

To report your non-IBM certifications, open your employee profile and follow this procedure:

1. From your Employee information, scroll down to Non-IBM Certifications and click the box to add or view non-IBM certifications .
2. In the new window that opens, select the Non-IBM Certification(s) that you want to report via the pull-down list.
3. Save/exit and retain the confirmation number for future reference.
4. You must provide evidence of the achieved certification in one of the following ways:
 - **e-mail** to bpcert@us.ibm.com
Attach the scanned certificate. This method is the fastest and least expensive.
 - **Fax** to 800-242-6329 (USA) or 770-863-3030 (outside USA) to the attention of "BP Certify" and include your e-mail address in case we need to correspond further with you.
 - **Mail** to Professional Certification Program from IBM
IBM Corporation
7100 Highlands Parkway
Mail Drop CO4-04
Smyrna, GA 30082 USA

Include your e-mail address in case we need to correspond further with you.

Non-IBM Certifications

Select an entry from the list below, then choose the action from the available buttons.
