

IBM Research - India, located in Delhi and Bangalore, is looking for outstanding researchers in computer science and related areas who want to work on real-world problems leading to solutions that make a direct and measurable impact. We are seeking applications for Researcher positions from fresh and experienced researchers overseas in the areas of information and knowledge management, interaction and collaboration technologies, systems management, distributed and high performance computing, software engineering, analytics and optimization, services innovation, and telecommunications. Successful candidates should have a PhD in computer science or equivalent, and an exceptional track record as demonstrated by publications, patents, and technical impact.

The areas of interest are:

- ✓Cloud computing
- ✓Next generation systems
- ✓Human Language Technologies
- ✓Analytics & Optimization
- ✓Mobile applications / telco domain
- ✓Information management
- ✓Software Engineering

Application Procedure: Please send your resume to careeirl@in.ibm.com

For further information please visit: www.ibm.com/in/research/careerops.html

Please note that the compensation is competitive according to the local market and will require work authorization. You will be contacted for the next steps, if we determine that there is a strong match.

IBM's Employment Policy: IBM is committed to creating a diverse environment and is proud to be an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, disability, age, or veteran status.
