

What do you do as an engineer/scientist?

Currently, I work as a lead integrator for the development and qualification of new chip technologies.

How do you use your technical training and/or degree today? How has it helped you?

In my thesis project I developed an understanding of many of the same unit processes that I now use in the development work at IBM.

What do you find most satisfying about your work?

Learning new skills and experimental techniques makes my job extremely satisfying and exciting.
