

What is your field of study? Why did you choose this field to work in?

[My field is] Electrical Engineering; I chose this field because I enjoyed math and science classes in high school and engineering seemed like a natural extension of those interests.

Is the engineering/science/technology field different than what you thought it would be?

Yes- I had originally thought that most time would be spent in a lab. In actuality, most design work is done on a computer in an office setting.
