

What do you do as an engineer/scientist?

I am currently employed as a manager in the development organization of Printing Systems.

How do you use your technical training and/or degree today? How has it helped you?

Primarily I use the problem solving, logical thought processes, simplification techniques and diligence that my Chemical Engineering degree provided to me.

What do you find most satisfying about your work?

Although, I have only been a manager for a short amount of time, I thrive on the personal interactions that I have with my employees. I did not realize how motivated I am to motivate, enlighten and empower other individuals.
