

What do you do as an engineer/scientist?

I currently work as a Software Consultant. I work on client sites, aiding in the development of software to form complete technical solutions for a business problem/need.

How do you use your technical training and/or degree today? How has it helped you?

I use my technical background everyday in coding, problem/solution analysis, and solution design. The fundamentals of science problem solving help in my everyday work.

What do you find most satisfying about your work?

I love that there is a solution that can be found and implemented to the problems we are presented with. The concreteness of my work is great.
