

What is your field of study? Why did you choose this field to work in?

My field of study is Electrical Engineering. I chose Electrical Engineering because growing up I was very scientific and Electrical Engineering seemed to have a wide range of possibilities for future growth.

Is the engineering/science/technology field different than what you thought it would be?

No, I was very active in engineering and science growing up. My family and friends exposed me to many different work experiences that helped me when I entered the field after college.
