

What do you do as an engineer/scientist?

I analyze and solve problems.

How do you use your technical training and/or degree today? How has it helped you?

Technical training has helped me in every job I have done during my career. It has helped me gain deep knowledge of the industry, understand better how to solve business issues with technology. The training has given me solid analytical skill to address [and surmount] key challenges to achieve business objectives. I can also communicate better with engineers because I share a common language with them.

What do you find most satisfying about your work?

The opportunity to contribute, to learn, to solve challenging problems and feel a sense of accomplishment.
