

IBM Self Checkout Systems

IBM transforms how you **attract** consumers, and empowers them to, **interact and transact** through innovative technology ... like their full line of Self Checkout Systems.

New cashless models and industry-leading software make it easy to build and manage the self-checkout options that **attract** today's convenience-minded consumer.

Interaction becomes intuitive through the easily-customizable, feature-rich graphical user interface that welcomes and guides consumers through the transaction.

Above-the-counter, ergonomic design helps consumer's complete **transactions**. It means more convenience for them and less time training for you.

Enhance the consumer experience; boost customer loyalty; and increase your revenue. It's all possible with IBM Self Checkout Systems – *offering proven solutions, based on retail-hardened ergonomic design and a powerful, flexible software environment.*
