IBM NetVista X Series integrated flat panel PC

Extraordinary, space-saving design with high performance

Delivering a better e-xperience
When it came time to redesign an award-winning computer, the focus at IBM was to make the new IBM NetVista X Series models deliver a better e-xperience. Intel® Pentium® 4 processors, new easy access to components, and an integrated 15" or 17" TFT display make it a simpler, and more powerful computing experience.

Reclaim your workspace
NetVista X Series models save up to 75% more space than standard Pentium 4 desktop systems. The keyboard stores beneath the monitor, while the optical drive hides in the pedestal when not in use. X Series models are optimized for connectivity, with cable management and 6 conveniently located USB ports. An optional Radial Arm creates a truly liberating experience in tight quarters.

Ready for tomorrow
NetVista X Series models are great for the enterprise. Select workhorse models, a stable software image and room to upgrade make X Series models ideal long-term solutions. A host of tools, including Wake on LAN® and the Software Delivery Assistant keep IT management simple. And with Pentium 4 processors and a 400MHz system bus, these desktops are built for speed and performance.

No worries
The IBM Embedded Security Subsystem, available on select NetVista X Series models, gives you peace of mind that your e-mail and files can obtain an extra level of protection as they travel across the Internet (Communication encryption requires separate third-party software.) An impressive variety of limited warranty options* are also available. Rest assured that your data and your investment have enhanced protection with industry-leading security features from IBM.

*See page 6 for additional warranty information.

Highlights
- Easily access and upgrade components with entirely new modular design
- Regain valuable space with sleek, space-saving design and choice of integrated 15" or 17" flat panel display
- Confidently deploy long-term X Series workhorse models with a stable software image
- Help secure e-business transactions and communications with the IBM Embedded Security Subsystem and IBM Client Security Software (select models)
- Rely on award-winning IBM service and support

Choose IBM today | Go to ibm.com or call 1 888 SHOP IBM to buy direct, locate an IBM reseller or for more information.
NetVista X Series features

1 Toolless modular design
2 IBM Embedded Security Subsystem
3 Integrated flat panel display
4 Access IBM
5 Low-profile PCI slots
6 Integrated speakers
7 Hidden optical drive
8 Optional NetVista X Series Radial Arm
9 IBM High Rate Wireless LAN
10 Optional wireless keyboard and mouse

Experience NetVista advantages

1 Upgrades are easier and repairs are faster with toolless hatchback cover removal, toolless low-profile PCI slots and toolless internal bay access
2 IBM Embedded Security Subsystem and IBM Client Security Software can help establish more secure e-business transactions and communications (select models)
3 Integrated 17" or 15" flat panel monitors provide a large viewing area with a crisp digital image; touch screen models available
4 Access IBM simplifies access to a universe of online and on-system information, including resources and help with set up and enhancements for your NetVista system.
5 Two available low-profile PCI slots allow for expandability, including modem, wireless or serial port cards (select models)
6 Integrated stereo speakers add dynamic audio (17" monitor offers speakers lower on the display)
7 Optical drive—CD-RW/DVD-ROM combination drive, CD-RW, DVD-ROM or CD-ROM—is concealed in main pedestal
8 The optional NetVista X Series Radial Arm provides a wide range of motion that is adjustable to your needs and is clamp, wall or through-desk mountable for even more workspace
9 IBM High Rate Wireless LAN PCI Adapter offers Wi-Fi certified connectivity for environments where fixed wiring is less practical
10 Wireless keyboard and mouse option delivers even more freedom and less clutter

**Award-winning service and support**

- Global IBM service and support
  - Three-year limited warranty*
  - One-click access to online service and support for your particular system through Access IBM®.
  - Staff at HelpCenters® quickly help you get the answers you need, 24 hours per day, 7 days a week.
  - Register for proactive e-mails from the IBM technical support staff to keep up-to-date on the latest updates and information about your system.

*See page 6 for additional warranty information.*

---

**The first to integrate a security chip in a PC**

- The IBM Embedded Security Subsystem, available on select NetVista and ThinkPad® systems, consists of the IBM Embedded Security Chip and IBM Client Security Software 2.0. Working together, these components provide levels of security not previously available.
- The IBM Embedded Security Chip provides hardware-based protection of critical security information, including passwords, encryption keys, and electronic credentials, helping to keep them safe from “sniffers,” Trojan Horses, and other potential invaders.
- The IBM Client Security Solution software provides the interface between security-aware applications and the functionality of the chip. In addition, it provides support for a variety of the latest third-party peripheral security devices that control access to the PC itself.

---

**Manageability services**

**Easier long-term deployments**

**Installation Services**

- Get your new systems up and running with ServicePac® for Installation Plus Data Migration. Basic and enhanced services let you pick the level of service you need. Both offer data migration to get your new systems functioning like your old systems quickly.

**Data Migration Kits**

- Easily move the data from your old system to your new system with an IBM Data Migration Kit. These kits include the hardware and software you need to transfer the data files and personal settings from your old computer.
- Visit [ibm.com/pc/services](http://ibm.com/pc/services) for more information.

---

**Additional services**

**Recycling services**

**Installation Services**

- Our basic and enhanced installation services let you select the level of service you need based on your locations, products, inventory and required completion dates. We even offer volume discounts for large installations.

Intel Innovative PC Award Winner, NetVista X41

Intel Corporation
Fall, 2001
**IBM NetVista X Series Radial Arm**

22P7332  Gain even more workspace with the IBM NetVista X Series Radial Arm. Redesigned exclusively for X41 models, the arm allows a NetVista X41 to be installed in a wide range of environments. The NetVista X Series Radial Arm delivers 360 degree rotation, 16 inches of vertical movement and a reach of 24 inches.

**Wireless Keyboard and Mouse**

22P5170  If eliminating clutter and cumbersome cables is a goal, then the IBM Wireless Keyboard and Mouse combination is essential. The IBM Wireless Keyboard and Mouse communicates with the NetVista X Series models using RF technology. The keyboard has 17 Rapid Access buttons for productivity, and the ScrollPoint® mouse allows for scrolling in all directions.

**Bluetooth™ UltraPort Module from IBM**

09N9811  Want to communicate with your printer, scanner and other Bluetooth enabled devices without the need for cables? Add a Bluetooth UltraPort Module to your NetVista X Series model and say good-bye to extraneous cables. The Bluetooth UltraPort Module connects via USB and has a range of 10 feet.

**IBM System memory**

10K0061 (512MB)  Adding memory is a cost effective way to improve your desktop's performance. Attractively priced memory from IBM can help you get more out of demanding applications. Available in a variety of size configurations. (256MB PC133 NP SDRAM DIMM)

**IBM 675 UPS**

33L3448  Protecting your system involves more than just backing up files and scanning for viruses. Help guard against power losses and surges with an IBM Uninterruptable Power Supplies (UPS). A UPS can help guard against power surges from lightning strikes, protect multiple systems, and gracefully shut down computers in the event of power trouble.

**IBM Wireless connectivity**

22P6901  The NetVista X Series already fits into many spaces that conventional CRT systems can’t go. Now stay connected to the network with even fewer constraints by adding: IBM High Rate Wireless LAN PCI Adapter (Low-profile Enabled) (22P6901), IBM High Rate Wireless LAN Access Point 500 (09N9906), IBM High Rate Wireless LAN Gateway (22P6401).

**IBM 32MB USB Memory Key**

22P5296  The ultimate in portable storage. This device is a quick, easy and cool way to transport files up to 32MB. No need to install software, just insert the key into an available USB port and go. The 32MB memory key offers plug and play file storage.

**IBM USB Portable Diskette Drive**

05K9276  Gain easy access to your files with the IBM USB Portable Diskette Drive. This small and light unit connects quickly and easily via a USB port and requires no external power.
