

**CST 3rd Quarter 2009
1st Addendum (RSU0910)**

Dated: November 12, 2009

Prepared by: CST Team

This addendum is based on the CST 3rd quarter 2009 recommendation (RSU0909 - all service through end of June 2009 not already marked RSU and PE resolution/ HIPER/Security/Integrity/Pervasive PTFs and their associated requisites and supersedes through August 2009).

The contents of this addendum (RSU0910) are PE resolution and HIPER/Security/Integrity/ Pervasive PTFs and their associated requisites and supersedes through the end of September 2009; however, the following products/tools are all service through the end of September 2009 not already marked RSU:

- O Java 1.4.2, service level SR13 Fixpack 2 (PTF UK50752)
- O IBM 31-bit SDK for z/OS, Java 2 Technology Edition, V5, service level SR 10 (PTF UK48410)
- O IBM 64-bit SDK for z/OS, Java 2 Technology Edition, V5, service level SR 10 (PTF UK48412)
- O WebSphere Application Server for z/ OS V6.1.0 – Service Level 6.1.0.27 – build level cf270934.08
- O WebSphere Application Server for z/ OS V7.0.0 – Service Level 7.0.0.6 – build level cf060930.09

If more information is needed regarding our CST 3rd quarter recommendation, the URL follows: http://www.ibm.com/servers/eserver/zseries/zos/servicetst/cst3q09_final.pdf

Problems Encountered

The APARs listed in the table below represent the problems the CST team encountered during the month following the quarterly recommendation; however, if a problem was encountered and corrected for this recommendation, it will not be listed in the table below. The APARs listed below are either open, or their associated PTFs were not yet available for testing in the CST environment prior to this recommendation. Customers should verify APAR status through normal means.

Note: Consolidated Service Test does not replace the regular service procedure. If a problem is encountered with product code, you should report the problem to IBM support.
