IBM Cloud Services Agreement

IBM Cloud Service Description: IBM Mobile Application Security for Bluemix

Except as noted below, the terms of the IBM Bluemix Service Description or Terms of Use, as applicable, apply.

The following is the Service Description for the Cloud Service:

1. Cloud Service Description

   The Mobile Application Security service (MAS) centrally manages application access and provides a basic application security framework for the Mobile Cloud services. This includes providing a developer with the ability to block access to applications on specific devices.

2. Entitlement and Billing Information

   2.1 Charge Metrics

   The Cloud Service is offered in accordance with the following charge metric(s):

   Addressable Device - An Addressable Device is a device upon which an application is installed that is addressable by the Cloud Service. Each application installation that is addressable by the Cloud Service counts as a separate Addressable Device. You will be charged for each Addressable Device registered with or managed or processed by the Cloud Service during the billing period.

3. Safe Harbor Framework

   The Cloud Service does not comply with the US-EU and US-Swiss Safe Harbor Frameworks.
