IBM Cloud Services Agreement

IBM Cloud Service Description: MQ Light for Bluemix

Except as noted below the terms of the IBM Bluemix Service Description or Terms of Use, as applicable, apply.

The following is the Service Description for the Cloud Service:

1. Cloud Service Description
   MQ Light for Bluemix is a cloud-based messaging service that provides a flexible and easy-to-use messaging service for Bluemix applications. You can use MQ Light for Bluemix to send single messages to individual recipients by way of shared destinations, or as a publish/subscribe broker for sending messages to multiple recipients by using exclusive destinations.

2. Entitlement and Billing Information
   2.1 Charge Metrics
       The Cloud Service is offered in accordance with the following charge metric(s):
       Million Digital Message – A Digital Message is an electronic communication managed or processed by the Cloud Service. You will be charged for the number of Digital Messages, rounded up to the next million, during the billing period.

       MQ Light for Bluemix counts the payloads sent to the service or received from the service containing up to 64Kb of data as one Digital Message. Where payloads sent or received are larger than 64Kb, these will be counted as multiple 64Kb Digital Messages (for example an application that sends a payload containing 128Kb data will be counted as 2 Digital Messages, an application that sends a payload containing 129Kb data will be counted as 3 Digital Messages.)

3. Safe Harbor Framework
   The Cloud Service does not comply with the US-EU and US-Swiss Safe Harbor Frameworks.
