IBM Geospatial Analytics for Bluemix

Except as noted below the terms of the IBM Bluemix Service Description or Terms of Use, as applicable, apply.

The following is the Service Description for the Cloud Service:

1. Cloud Service Description
   The Geospatial Analytics service allows Client to monitor when devices are within geographical regions of interest right from Client’s Bluemix application.
   The Geospatial Analytics service can be used in applications to support many different use cases:
   - Offering real-time promotions to customers who are nearby specific retail locations.
   - Alerting cars or other connected devices of regions to avoid, for example, where accidents or emergency situations occurred.

2. Entitlement and Billing Information
2.1 Charge Metrics
   The Cloud Service is offered in accordance with the following charge metric(s):
   **Million Events** - An Event is an occurrence of a specific event that is processed by or related to the use of the Cloud Service, as described in the Cloud Service description. Client will be charged for the number of Events, rounded up to the next million, during the billing period.

3. Safe Harbor Framework
   The Cloud Service does not comply with the US-EU and US-Swiss Safe Harbor Frameworks.
