IBM Cloud Services Agreement

IBM Cloud Service Description: IBM Static Analyzer Beta

This service is in beta. Except as noted below the terms of the IBM Bluemix Service Description or Terms of Use, as applicable, apply.

The following is the Service Description for the Cloud Service:

1. Cloud Service Description

   The Service is designed to identify a variety of potential security and compliance issues in applications and web services. It does not test all vulnerabilities or compliance risks, nor does it act as a barrier to security attacks. Security threats, regulations and standards continually change, and the Service may not reflect all such changes. The security and compliance of Customer’s application, systems and employees, and any remedial actions, are Customer’s responsibility alone. It is solely within Customer’s discretion to use or not use any of the information provided by the Service.
