

# IBM Cloud Additional Service Description

---

## IBM Workload Scheduler for IBM Cloud

Except as noted below, the terms of the IBM Cloud Service Description apply.

### 1. Cloud Service

#### 1.1 Offerings

The Client may select from the following available offerings.

##### 1.1.1 IBM Workload Scheduler for IBM Cloud

IBM Workload Scheduler for IBM Cloud is a service that allows developers to automate both one time and recurring actions. Those actions (REST call, database query, etc.), performed on a system or an application, are called jobs.

By leveraging the service's API client libraries, developers can design simple or complex processes of jobs, define the triggers for the execution, and track progress and status of the processes and their jobs.

In particular, IBM Workload Scheduler for IBM Cloud is able, through available APIs, to:

- a. combine jobs into flows and attach conditions in any point of the flow (define jobs as command, rest API calls, etc.);
- b. automate the execution of jobs against a schedule (one-time, daily, weekly, under defined-period,) or event triggers (file created, modified or deleted); and
- c. present jobs and flows in summarized views where they can be monitored and manipulated.

IBM Workload Scheduler support also Cron definitions.

### 2. Data Processing and Protection Data Sheets

The Data Sheet applicable for this service and the terms of this section provides the details and terms, including Client responsibilities, around use of this service. The following Data Sheet(s) apply to this service:

<https://www.ibm.com/software/reports/compatibility/clarity-reports/report/html/softwareReqsForProduct?deliverableId=1415200372083>

### 3. Service Levels and Technical Support

#### 3.1 Service Level Agreement

The service level agreement set forth in the base IBM Cloud Service Description applies to this service.

#### 3.2 Technical Support

The support terms set forth in the base IBM Cloud Service Description apply to this service.

### 4. Charges

#### 4.1 Charge Metrics

The charge metric(s) for the Cloud Service are specified in the Transaction Document.

The following charge metrics apply to this Cloud Service:

- Job is an object within the Cloud Services that cannot be further divided and represents a computing process including all its sub-processes managed or processed by the Cloud Services.

#### 4.2 Partial Monthly Charges

Each Job is billed on a monthly basis. Partial month deployment/usage will be pro-rated.
