IBM Watson Language Translation

Except as noted below the terms of the IBM Bluemix Service Description or Terms of Use, as applicable, apply.

1. Cloud Service Description
The IBM Language Translation Service translates text from one language to another for specific domains. Currently, the languages and domains supported are:

• News (English to / from French, Spanish, Portuguese, or Arabic)
• Conversational (English to / from French, Spanish, Portuguese, or Arabic)
• Patent (Spanish, Portuguese, Japanese, or Korean to English)

The Cloud Service can be used for development of applications that may only be used internally within Client’s enterprise.

2. Content, Data, Feedback and Suggestions

2.1 Rights Granted by Client
In order to improve or enhance the Cloud Service, or to develop new services, IBM may use Client’s content and data that Client provides to the Cloud Service.

By using the Cloud Service, Client agrees, and agrees to notify its end users who use Client’s application, that IBM may access, use, copy, distribute internally, and extract, compile, synthesize, analyze and otherwise make derivative works of Client’s and Client’s end user’s content and data to improve or enhance the Cloud Service, or to develop new services. Client and Client’s end users will not be identified in any such enhancements or new services.

Client agrees the content or data and any suggestions or feedback provided will not include confidential information of Client or any other person or entity. IBM may use for any purpose without restriction any feedback and suggestions that Client or its end users provides. Client represents and warrants it will obtain all required authorizations prior to providing the content, data, suggestions and feedback to the Cloud Service.

2.2 Opt Out
Client may at any time request IBM to discontinue use of Client’s content or data by revising the header in a REST API call with the following additional header when submitting Client’s data:

"X-WDC-PL-OPT-OUT: 1"

As an example, if Client’s original request was:

curl -u <username>:<passwd> -H "Accept: application/json" -d <payload_data> <service_url>

Client must revise as follows:

If Client revises the header in Client’s REST API call, IBM will then discontinue future use of Client’s content and data associated with that submission.

3. Entitlement and Billing Information

3.1 Charge Metrics
The Cloud Service is offered in accordance with the following charge metric(s):

Event – An Event is an occurrence of a specific event that is processed by or related to the use of the Cloud Service, as described in the Cloud Service description. Client will be charged for the number of Events, during the billing period.

Instance - An Instance is access to a specific configuration of the Cloud Service. Client will be charged for each Instance of the Cloud Service that exists during each month during the billing period.
**Thousand Characters** – A Character is any encoded symbol (such as a letter, number, icon, or space) that represents information. Client will be charged for the number of Characters processed by the Cloud Service during each month during the billing period rounded up to the next Thousand Characters.

3.2 **Partial Month Charges**

Each Instance is billed on a monthly basis. Partial month usage will be pro-rated.

4. **Safe Harbor Framework**

The Cloud Service does not comply with the US-EU and US-Swiss Safe Harbor Frameworks.
