Except as noted below the terms of the IBM Bluemix Service Description or Terms of Use, as applicable, apply.

1. **Cloud Service Description**
   The Streaming Analytics service allows Client to ingest, analyze and correlate data as it arrives from real-time data sources. Client can view information and events as they unfold.
   
   Client can use the Streaming Analytics service to:
   
   * Analyze data in motion.
   * Deploy Client’s InfoSphere Streams applications to the Cloud.

2. **Entitlement and Billing Information**

2.1 **Charge Metrics**
   The Cloud Service is offered in accordance with the following charge metric(s):

   **Virtual Server-Hour** – A Virtual Server is either a virtual computer created by partitioning the resources available to a physical server or an unpartitioned physical server. Client will be charged for each full or partial hour for each Virtual Server provisioned in Client’s instance of the Cloud Service during the billing period.

3. **Safe Harbor Framework**
   The Cloud Service does not comply with the US-EU and US-Swiss Safe Harbor Frameworks.
