IBM Insights for Weather for Bluemix

Except as noted below the terms of the IBM Bluemix Service Description or Terms of Use, as applicable, apply.

The following is the Service Description for the Cloud Service:

1. Cloud Service Description

The Weather Company and its business services group, WSI, provide weather data, both historical and forecasted. This offering makes the WSI data available in Bluemix, through a RESTful API. Insights can be added to Bluemix applications to include weather data; with maps, graphs and forecasting for applications across many industries impacted by the weather.

The following Insights for Weather for Bluemix packages are offered with unlimited locations and worldwide coverage. The data is in JSON format.

- **Standard 1-Day Hourly** Forecasts for next 24 hours starting from the current time.
- **Standard 10-Day Daily** - Forecasts for 24-hour periods starting today for the next 10 days including forecasts for the daytime and nighttime segments. This forecast includes the forecast narrative text string of up to 256 characters with appropriate units of measure for the location and in the language requested.
- **Site Based Observations** - Observed weather data (temperature, wind direction and speed, humidity, pressure, dew point, visibility, and UV Index) as well as a sensible weather phrase and its matching weather icon that are collected from METAR and SYNOP observation devices in the U.S. and worldwide.
- **Time-Series Based Observations** - Observed weather data from site-based observation stations for the previous 24 hours.

1.1 Base tier

The Insights for Weather Base tier provides a maximum of 5,000 API calls per day. This is based upon calls to the Weather Service API on a daily basis, and charged on a monthly basis. Once the maximum API call limit has been reached, Client must upgrade to the Premium tier.

1.2 Premium Tier

The Insights for Weather Premium tier provides a maximum of 50,000 API calls per day. Once the maximum API call limit has been reached, the Premium tier will not allow any API calls. In such cases, Client must contact their IBM sales representative.
