

IBM Cloud Additional Service Description

IBM Cloud Hyper Protect DBaaS – Experimental

This service is in beta/experimental. The terms for this service are found in the IBM Cloud Service Description as appropriate and as modified by the provisions below.

1. Cloud Service Description

IBM provides Hyper Protect DBaaS to manage different database types (see restrictions) in a highly secure fully managed database service. The service is running on LinuxONE in the IBM Cloud and delivers a secure, isolated compute environment ideally suited for workloads with sensitive data. It offers a flexible and scalable platform that allows end users to quickly and easily provision and manage their database of choice. IBM Z and LinuxONE are the best platforms to fulfill these requirements.

2. Restrictions

Hyper Protect DBaaS experimental is provided for proof of concept evaluation purposes only and must not be used for development purposes, in production or a production environment.

3. Content and Data Protection

The Data Sheet applicable for this service and the terms of this section provides the details and terms, including Client responsibilities, around use of this service. The following Data Sheet(s) apply to this service.

<https://www.ibm.com/software/reports/compatibility/clarity-reports/report/html/softwareReqsForProduct?deliverableId=3ECAD0F0115D11E8BE1A0F0F1F3F9A88#>

4. Entitlement and Billing information

The Hyper Protect DBaaS experimental service is free of charge.

5. Enabling Software

In order to use the RESTful API or the command-line interface, download the DBaaS client tool as described in the Hyper Protect DBaaS documentation at

<https://console.bluemix.net/docs/services/hypersecure-dbaas/index.html>.
