

IBM Policy Based Security

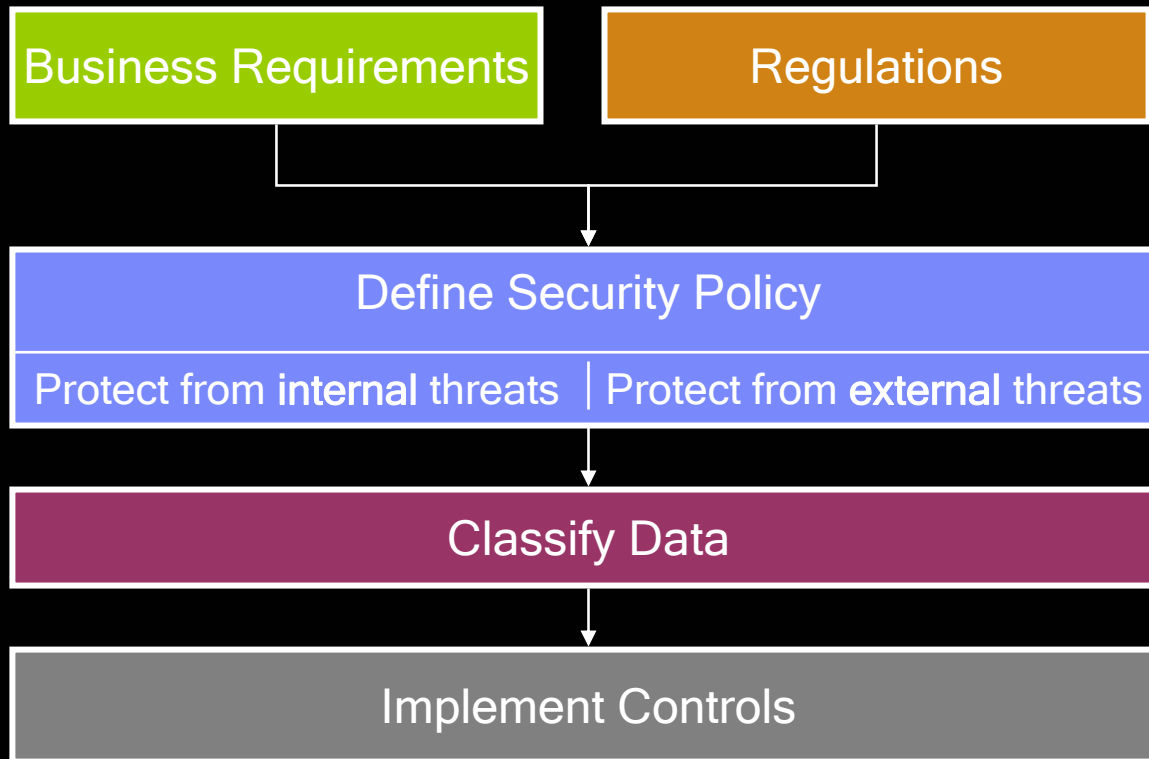

IBM Secure Perspective * Bridging the Divide Between Policy and Practice

* w/ NEW features

21 September 2007

A Policy Based Approach to Security

IT Policy Creation - *Are You Ready?*

- **Challenges**
 - Which Regulations Apply
 - Industry Best Practices
 - Writing and Maintaining
 - Implementation
 - Demonstrate Compliance
 - Reporting

Policy Defines Security

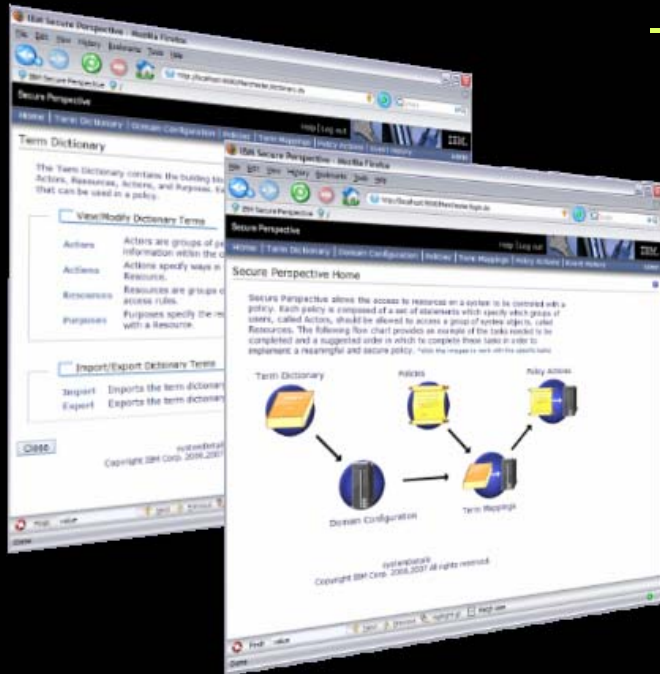

Clients are looking for a security solution that seamlessly connects corporate policy to IT security.

Finally, a tool that
allows organizations to create policy using natural
language and then implement that
policy seamlessly

Secure Perspective Product Features

- Enables you to create your policy using natural language
- Implements your system security settings
- Demonstrates compliance to your policy
- Reports on compliance

Flash Demo

NEW Features

✓ In addition to the System i platform, create, implement, and monitor security policies across multiple platforms

✓ AIX®, Windows®, and DB2®

Data-centric Security

Raising the Bar with Secure Perspective

Data-centric Security

- ✓ Reinforces traditional security
- ✓ Classify and protect your most critical data
- ✓ Access control to individual objects and folders

Traditional Security

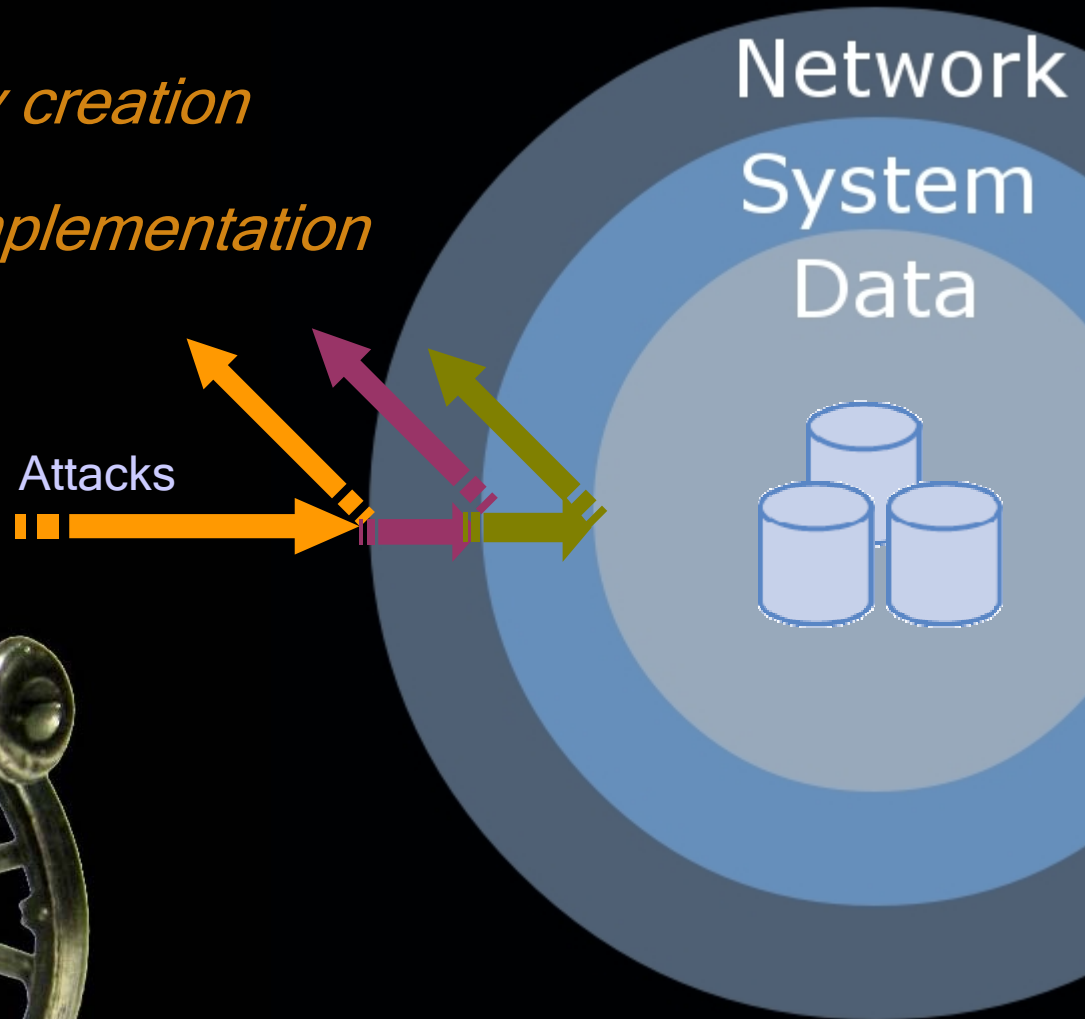

Firewalls, Virus Scanning, Password Management, Default Privileges, Encryption

IBM Secure Perspective

→ *Natural language policy creation*

→ *Data-centric security implementation*

Product Offering

- **US List Price**
 - \$1,500 per managed processor

Information is provided "AS IS" without warranty of any kind.

The customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.

Information concerning non-IBM products was obtained from a supplier of these products, published announcement material, or other publicly available sources and does not constitute an endorsement of such products by IBM. Sources for non-IBM list prices and performance numbers are taken from publicly available information, including vendor announcements and vendor worldwide homepages. IBM has not tested these products and cannot confirm the accuracy of performance, capability, or any other claims related to non-IBM products. Questions on the capability of non-IBM products should be addressed to the supplier of those products.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Some information addresses anticipated future capabilities. Such information is not intended as a definitive statement of a commitment to specific levels of performance, function or delivery schedules with respect to any future products. Such commitments are only made in IBM product announcements. The information is presented here to communicate IBM's current investment and development activities as a good faith effort to help with our customers' future planning.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the ratios stated here.

Prices are suggested U.S. list prices and are subject to change without notice. Contact your IBM representative or Business Partner for the most current pricing in your geography.
