IBM i support for Domino releases

	IBM i 7.1 ⁽¹⁾	IBM i 6.1 ⁽¹⁾ and i 6.1.1	IBM i 5.4 and i 5.4.5
Domino 8.5.1, 8.5.2, 8.5.3	X	X	X ⁽²⁾
Domino 8.5	Not supported	X	X ⁽²⁾
Domino 8.0.1, 8.0.2	Not supported	X ⁽²⁾	X
Domino 8.0	Not supported	Not supported	X

Notes:

- 1) Upgrading to i 6.1 or i 7.1 from i 5.4 or earlier releases requires careful preparation. Some product versions require installation of fixes. It is highly recommended that you ensure your Lotus product installations are compatible with the new OS level before upgrading. More detailed information is available here: www.ibm.com/systems/i/software/domino/support/v6r1.html
- 2) In the cases noted, installing Domino requires special processing to convert programs and service programs to run on the installed OS level. This conversion may significantly impact product install time or post-install processing. To simplify product installation or future OS upgrade, installing Domino 8.5.x on i 6.1 (or later) is recommended. See www.ibm.com/systems/i/software/domino/support/v6r1.html for more information.
- 3) Support for Domino 7.0.x ended on April 30, 2011.

Notes:

- 1) Lotus Quickr does not always support new Domino MRs. Before upgrading a Lotus Quickr server to a later Domino release, verify that an enabling fix is available for that release: www.ibm.com/systems/i/software/quickr/. All Lotus Quickr servers in the same LPAR must use the same Domino release.
- 2) Domino Fax was withdrawn from marketing in January, 2011, and end of support is April 30, 2012. A Domino Fax update is required for Domino 8.0.x and 8.5.x. See www.ibm.com/systems/i/software/domino/related/fxd/faxupdates.html
- 3) Support for Lotus Domino 7.0.x, Lotus Quickr 8.0.x, and LEI 7.0.x ended on April 30, 2011. However, Domino 7.0.x can be used to run Domino Document Manager until support for that product ends on September 30, 2012.
- 4) Domino allows multiple releases within an LPAR; extended products allow one release installed per LPAR.
