

Hosted Client Environment Solutions

Special Fall Event

Oct. 15, 2009

Are you struggling with...

- The rising cost of maintaining PCs?
- The exploding number of PC configurations & system images?
- Data security, availability and back up for distributed work force?
- And/or limited control of employee home PCs, as well as partner and contractor-owned PCs?

IBM Executive Briefing Center in RTP, NC

In partnership with

Offers you an opportunity

to look at the next generation of client offerings designed to address this increasingly complex and costly environment. Through the execution of a hosted client implementation, IBM and our technology partners explore today's opportunities to:

★ **Improve security** ★ **Simplify manageability** ★ **Reduce cost** ★

This event will include an architectural review discussing the strengths of each different approach available today such as shared services, virtual hosted clients, etc. We will demonstrate many of these technologies and management tools which will further enhance client solutions. Additionally, service offerings to help with the planning, implementing and/or supporting of this new environment will also be discussed.

Event Details:

Date: Thursday, October 15, 2009
