- **Security consulting/ education tailored for specific organizational levels**
- **Technologies and techniques to solve specific problems**
- **Expertise and experience to analyze and assist with analysis and implementations of heterogeneous environments**
- **Broad security topic coverage—from policy definition to implementation.**

Stay Out of the Headlines!

Is your business protected from all the threats to IT infrastructure? Has adequate protection been built into new requirements and environments? Are the right security solutions being selected to support security policies? Are systems and data secure? Secure enough? What does adequate and inadequate security cost?

IBM Systems and Technology Group (STG) Lab Services and its security consultants can help you find the answers to these questions through service offerings that assist in the development of general enterprise security or just to make sure your system settings maximize the protection you want and need to prevent your organization from being tomorrow's headline!

We can work with you to implement password elimination and SSO, data encryption, or a system security healthcheck. We can help you address general security aspects from managing the process of security in your enterprise to finding the most cost effective way of implementing your security policies.

We can work with you to identify, architect or implement new security management policies that improve your security and reduce the cost of managing security in your environment. We can also help you best address potential security impacts to your business as a result of adding new systems, new applications or different network topologies to your existing environment.

STG Lab Services Security Assessment and SSO Consulting Services

The effort and time required for assessment of specific client environments is dependent upon the number of systems, the specific client infrastructure, and the high availability objectives the client is trying to achieve. Contact an STG Lab Services System i Opportunity Manager for an estimate of the time necessary for IBM to perform an availability assessment on your IT infrastructure.

Pricing

1. *\$ 195/hr. (US) plus travel time and actual travel expenses.*
2. *Travel time to the client's location is billed at 1/2 the hourly rate.*
