

## IBM® System i™ WebSphere® Portal Services

Integrate applications or build a comprehensive portal solution

---

### Offering Highlights

---

***This offering is available to those who need expert skills and assistance in architecting, developing and deploying a WebSphere Portal solution.***

- ***A methodology to help produce quick, satisfactory results***
- ***Technologies and techniques to solve specific problems***
- ***Expertise and experience to assist with analysis, architecture, and implementations in heterogeneous environments***
- ***Ability to address unique aspects and requirements of your security policies and concerns***

### **Ready to Act on Your Needs**

Whether ready to deploy a portal solution or upgrade an existing portal, investing in new technology can feel risky. To justify the investment, one needs to ensure it will meet business needs, be compatible with IT infrastructure and fit within the budget. When ready to deploy, it needs to be done quickly—and correctly!

The professionals from STG Lab Services can assist you with the benefits of integrating applications, or they can collaborate on a comprehensive portal solution. STG Lab Services can ensure effective and rapid development, deployment and implementation of WebSphere Portal solutions for your System i environment. The WebSphere Portal offering provides various options that fit your unique requirements.

### **WebSphere Portal Pilot**

A pilot is an initial, short-term engagement allowing evaluation of the features and benefits of a collaborative WebSphere Portal within your controlled setting with a small subset of users over a short period of time. The pilot provides an approach to help deploy and implement effectively.

### **WebSphere Portal High Availability**

STG Lab Services will evaluate your current environment and assess the benefits of implementing a highly available portal solution with System i technology. We will assist in configuring the WebSphere Portal High Availability (HA) solution.

### **Portlet Development**

STG Lab Services can provide design and coding assistance in developing portlet applications. We can also assist in integrating existing solutions into WebSphere Portal.

### **Pricing**

Contact and opportunity manager for an estimate of the time necessary to build a proof of concept on your IT infrastructure. A typical engagement is 40 hours and costs approximately \$12,000 USD.

### **Who We Are**

STG Lab Services is one of the for fee services organizations of IBM's world renowned Systems & Technology Group development labs. Through STG Lab Services you can bring the expertise of the development community on the latest technologies to your enterprise. With deep skills in the IBM System i platform and related IBM products and software, security, Service Oriented Architecture (SOA) and application modernization, High Availability, performance analysis, and more, STG Lab Services can help you with your most difficult technical challenges. STG Lab Services exists to provide you with successful implementations of emerging technologies to help accelerate your

return on investment (ROI) and drive up your satisfaction with your IBM hardware.

### **Services We Provide**

STG Lab Services brings the skills and experience of the lab to your enterprise through on-site consulting, classroom training, and skills transfer to your personnel in your environment. STG Lab Services has both high quality, field tested offerings and the resources to bring customized solutions to your enterprise. Contact one of our opportunity managers for more information.
