

IBM System z™ Currency and Migration Jumpstarts

Move your new hardware investment further

Offering Highlights

STG Lab Services can provide hands-on training and implementation services to help you jumpstart and exploit the capabilities of your new IBM System z environment.

The key benefits of these jumpstarts for your IBM System z are:

- **We can help assist and contact other development lab experts and support centers to create your custom solution.**

- **As part of the lab, we have experience in future and current products relating to System z**

- **We can help transfer knowledge by working side by side with your staff**

- **Help mitigate risk by leveraging experienced consultants and proven best practices**

End to End Consolidation

STG Lab Services now has four System z jumpstarts available for new System z customers to move your new hardware investment further. The jumpstarts use a phased approach to implementation on System z, incorporating education, free services, and fee based services as well as a customized roadmap for future development and integration with your existing goals and infrastructure. These jumpstarts are available to existing clients, however a fee will be associated with all engagements.

Of the four basic jumpstarts listed, it is essential to choose one operational offering, giving you the building blocks for System z based operations for a z/OS® or Linux™ environment. The additional jumpstarts are enablers, allowing you to become immediately productive by migrating applications and/or data to System z.

Base z/OS Operations Jumpstart

- *Education roadmap*
- *SystemPac® services*
- *Implementing Work Load Manager (WLM)*
- *Security Administration for System z (RACF®)*
- *Automating your environment*

- *Applying system maintenance and fixpacks*
- *Developing an initial disaster recovery plan*
- *Customized roadmap for moving forward with System z*

Linux for System z and z/VM

Operations Jumpstart

- *Education roadmap*
- *Understanding VM*
- *Bringing up Linux in a z/VM® environment*
- *User administration*
- *Implementing WLM for Linux*
- *Managing multiple images in a single LPAR*
- *Customized roadmap for moving forward with System z*

Application Migration Jumpstart

- *Understanding which applications are good candidates to migrate*
- *Developing a migration process*
- *Understanding Java™ on System z*
- *Functional and performance testing/tuning an application on System z*
- *Deploying an application to production*
- *Customized roadmap for moving forward with System z*

Cross Platform Integration Jumpstart

- *Developing a data solution for integration to System z (ISVs included)*
- *Migrating data to System z*
- *Understanding data connectors on System z*
- *Functional and performance testing/tuning an application on System z*
- *Deploying an application to production*
- *Customized roadmap for moving forward with System z*

Pricing

To obtain this service, an opportunity manager can confirm requirements, create a statement of work and determine pricing.

Services We Provide

STG Lab Services brings the skills and experience of the lab to your enterprise through on-site consulting, classroom training, and skills transfer to your personnel in your environment. Whether it's training at your site, or conducting a jumpstart engagement to get you up to speed quickly, STG Lab Services is designed to help meet your technical assistance needs. STG Lab Services has both high quality, field tested offerings and the resources to bring customized solutions to your enterprise. Contact one of our opportunity managers for more information.
