

Advanced Copy Services for PowerHA

Extend IBM i ease-of-use and management to the resiliency of PowerHA

Features

- Complements PowerHA™ in an IBM i environment *
- Provides automation of PowerHA functions through single command switch/failover.
- Provides single command FlashCopy® execution that can also be programmed into nightly job streams. Optional parameters can be set or retrieved for automating configuration of different types of FlashCopy runs.
- Includes Control Language (CL) commands to retrieve and change Copy Services information for any type of environment managed.
- Provides simplicity in setup and operation of the PowerHA environment.
- Optional DS8000® Management Toolkit can add IBM i ease-of-use in managing the storage subsystem as part of the PowerHA solution.

* (PowerHA is a pre-requisite for this software-based service).

Typical Benefits

- Simple, automated, low maintenance solution that leverages reliable, hardware-based storage copy and replication services managed and controlled from a familiar IBM i command line interface.
- Extends the functional capabilities of PowerHA by leveraging latest storage features.
- Provides customized solutions outside of the typical PowerHA environment.
- Reduced personnel training requirements.
- Can provide enhanced IBM i to DS8000 integration.

Why IBM®?

- **Deep skills in IBM i implementation and integration.**
- **Experience in application architecture and design gained from thousands of engagements across many industries.**
- **Ability to deliver skills transfer as part of service engagement.**
