

Seattle suite information

Customer lounge areas

There is a break room located on the west side of the site. It has a TV with comfortable chairs, coffee maker, refrigerator, microwave, tables and chairs, and counters/cabinets for food preparation.

Customer suites

These areas have been designed and furnished to facilitate the exercising and/or implementation of your business recovery plan and are equipped with the following:

- Displays (317X, 319X, etc.)
- Work tables and chairs
- Customer telephones

The following office supplies are available:

- Note pads, pencils, ink pens, highlighter pens
- Stapler, whole punch, paper shredder
- One box of computer paper

Suite Configurations

The availability of this equipment to you is determined by your LAS contract specification. Keep in mind that while all Local Access Suites are similar, they are not identical; i.e., there may be a slightly different equipment configuration or suite layout at each. This may be important in your recovery planning.

If additional equipment is desired in the suite, you have the option of:

- contracting for additional existing LAS equipment and space, or if available, contracting for additional space for Dropship/Temporary Transfer Equipment to be shipped to the LAS

The moving/shipping charges, setup, teardown, and configuring of equipment is your responsibility, and the time necessary to accomplish it is included in your recovery exercise time period, so please plan your exercise/recovery time accordingly.

Workplace Recovery Services standard equipment

A Workplace Recovery Services (WRS) contract begins with the basic workplace, (approximately 48" x 30") and one standard voice telephone. Beyond that, contract options for the workplace available are:

voice recovery telephone agent set
PC workstation PC server non-PC
workstation printer LAN connection
network connection to other locations
