Every new IT generation which enters the workforce provides an opportunity to bring new skills onto your IBM Z® team. Performance and capacity optimizations are a mission-critical function. Therefore, it’s crucial that they keep their skills current.

Send your early career IBM Z programmers and engineers to the new z/OS for Rookies track at IBM Systems Technical Universities in Atlanta, Georgia. This track of sessions helps your newer team members to get started and go deep on IBM Z with hands-on training delivered by IBM Technical Training Instructors. But that’s not all.

IBM TechU is partnering with Interskill to offer 53 e-learning courses targeted at the rookies track attendees. These Interskill courses are available at no additional charge, from the time you register for TechU to three months after the event.

**Packed with a punch**

The z/OS for Rookies track offers in-depth training sessions and labs delivered on site combined with a self-paced e-learning curriculum.
