

2017

IBM Z Technical University

IBM Systems Technical Universities are designed for technical development in IBM Systems and solutions including IBM® Z, IBM Power Systems™ and IBM Storage. These events include skill-building sessions, hands-on labs, onsite certification testing and a vibrant Solution Center.

IBM Z sessions focus on the new IBM z14, along with IBM z/OS®, IBM z/VM®, Linux on z Systems, IBM LinuxONE and IBM z/VSE®. Reinventing IT for digital business, the new z14 -- the 14th generation of IBM's industry-leading mainframe platform, features pervasive encryption enabling you to provide the ultimate protection for your core corporate data. IBM z Systems provides the computing infrastructure for analytics, cognitive, and the new app economy. Designed to support actionable insights and open/connected/cloud, IBM Z applies in-transaction analytics and offer the most secure, trusted service delivery — all while transforming the efficiency and economics of IT.

IBM Storage sessions focus on IBM storage systems products and solutions. Experience rich technical content and hundreds of skill-building sessions, demos and hands-on labs led by product experts, with many led by IBM developers. Plus, learn from customer testimonials, explore the future direction of IBM disk and tape products, and hear about new products and services via IBM confidential briefings that require a signed NDA to attend.

Practical Information

Overview

The 2017 Z Technical University will allow you to explore the IBM Systems capabilities in depth and give you the opportunity to take a deep dive into smarter computing implementation, product announcements, as well as learn about key topics presented in a variety of tracks.

NEW - IMS Track

We are pleased to announce that the IMS Technical Symposium will be held as a featured track at the IBM Z Technical University. You can expect a full week of deep dive IMS education, including technical sessions, hands-on labs, and more. Your experience here will be the perfect combination of new energy and familiar camaraderie. More details will follow soon!

Who should attend?

This conference is intended for IBM clients, IBM Business Partners, Independent Software Vendors and System Integrators. IBM employees are also welcome to register for this event:

- IT executives and business managers
- IT architects
- Technical professionals who want to add and improve their skills
- Performance analysts, managers, data center managers
- Hardware or capacity planners who want to learn how to master, manage and exploit information
- Power Systems application & systems programmers, system administrators, technical support managers
- Anyone who plans to implement, manage, or operate IBM z Systems and IBM Storage.

All sessions will be in English.
