

Service Description

IBM Prescriptive Warranty for Manufacturing

This Service Description describes the Cloud Service. The applicable order documents provide pricing and additional details about Client's order.

1. Cloud Service

1.1 Offerings

The Client may select from the following available offerings.

1.1.1 IBM Prescriptive Warranty for Manufacturing

This IBM Cloud Service enables the detection of conditions that lead to accelerated wear and helps to minimize warranty claims.

2. Data Processing and Protection Data Sheets

IBM's Data Processing Addendum at <http://ibm.com/dpa> (DPA) and the Data Processing and Protection Data Sheet(s) (referred to as data sheet(s) or DPA Exhibit(s)) in the links below provide additional data protection information for the Cloud Services and its options regarding the types of Content that may be processed, the processing activities involved, the data protection features, and specifics on retention and return of Content. The DPA applies if and to the extent the European General Data Protection Regulation (EU/2016/679) (GDPR) applies to personal data contained in Content.

3. Service Levels and Technical Support

3.1 Service Level Agreement

IBM provides the Client with the following availability service level agreement (SLA). IBM will apply the highest applicable compensation based on the cumulative availability of the Cloud Service as shown in the table below. The availability percentage is calculated as the total number of minutes in a contracted month, minus the total number of minutes of Service Down in the contracted month, divided by the total number of minutes in the contracted month. The Service Down definition, the claim process and how to contact IBM regarding service availability issues are in IBM's Cloud Service support handbook at https://www.ibm.com/software/support/saas_support_overview.html.

Availability	Credit (% of monthly subscription fee*)
Less than 99.9%	2%
Less than 99.0%	5%
Less than 95.0%	10%

* The subscription fee is the contracted price for the month which is subject to the claim.

3.2 Technical Support

Technical support for the Cloud Service, including support contact details, severity levels, support hours of availability, response times, and other support information and processes, is found by selecting the Cloud Service in the IBM support guide available at <https://www.ibm.com/support/home/pages/support-guide/>.

4. Charges

4.1 Charge Metrics

The charge metric(s) for the Cloud Service are specified in the Transaction Document.

The following charge metrics apply to this Cloud Service:

- Asset is a uniquely identified tangible resource or item of value to be accessed or managed by the Cloud Services.
- Instance is each access to specific configuration of the Cloud Services.
- Item is an occurrence of a specific item that is managed by, processed by, or related to the use of the Cloud Service.
- Terabyte is 2 to the 40th power bytes processed by, used, stored, or configured in the Cloud Service.

5. Additional Terms

For Cloud Service Agreements (or equivalent base cloud agreements) executed prior to January 1, 2019, the terms available at <https://www.ibm.com/acs> apply.

5.1 Use Limitations

Definitions:

- a. **IBM SaaS Artifacts** – means the materials that are listed in the IBM SaaS Artifacts list in the IBM SaaS User guide. IBM SaaS Artifacts are a variety of predefined and preconfigured materials which include, but are not limited to: predictive models; business rules; message flows; business intelligence models, reports, active reports and dashboards; master data management model structure; and the data schema.
- b. **Asset** – An Asset is any tangible resource or item of value to be managed, including production equipment, facilities, transportation, IT hardware and software.

Client may use the Cloud Service to modify the IBM SaaS Artifacts or to create new IBM SaaS Artifacts (collectively, **Customized IBM SaaS Artifacts**).

IBM SaaS Artifacts and Customized IBM SaaS Artifacts may not be used independently of this Cloud Service.

Client has no obligation of support for Customized IBM SaaS Artifacts. Any Cloud Service warranties are not applicable to the Customized IBM SaaS Artifacts.

The Cloud Service may only be used with IBM Prescriptive Warranty for Manufacturing Data. IBM Prescriptive Warranty for Manufacturing Data is data directly attributable to Client's Assets or data that is used to analyze an Asset including contextual data.

The IBM SaaS and its output are not to be relied upon in substitution for the exercise of independent judgment.

Considerations identified by the IBM SaaS are suggestions only and do not replace Client's or IBM SaaS users' expert judgment. Based on the IBM SaaS users' own experience, courses of action not identified by the IBM SaaS may exist that should be considered.

The IBM SaaS should only be used to assist qualified personnel acting within their areas of competence, and only such persons are permitted to utilize the IBM SaaS.

The IBM SaaS does not include information on alternative options associated with each suggested option. These options are an important component of a comprehensive plan and should be carefully considered when making decisions.
