

IBM Cloud Additional Service Description

IBM Analytics for Apache Spark for IBM Cloud

Except as noted below, the terms of the IBM Cloud Service Description apply.

1. Cloud Service Description

IBM Analytics for Apache Spark provides a fully-managed Spark environment accessible on-demand. With this service, Clients get access to Apache Spark's next-generation. Users can start with a small amount of capacity for experimentation, extend to development and then scale to production, all within the same environment. The service is immediately ready for analysis, skipping setup hurdles thus providing a quick start to Client's Spark efforts.

IBM Analytics for Apache Spark runs job in-memory and may create temp files at various stages of data processing. Clients provide data that is available in one of the storage services which is external to Spark service e.g. IBM Cloud Object Storage. Storage provided by Spark is ephemeral and should not be used to persist any kind of data.

2. Content and Data Protection

The Data Sheet applicable for this service and the terms of this section provides the details and terms, including Client responsibilities, around use of this service. The following Data Sheet(s) apply to this service.
