

## IBM Cloud Container Registry

Except as noted below, the terms of the IBM Cloud Service Description apply.

### 1. Cloud Service Description

IBM Cloud Container Registry provides a hosted private registry, ensuring access is both secure and auditable. Client can securely store and share Docker images across its organization, allowing users to push and pull containers on-premises and off-premises. Client will be charged for an image pull (and not a push of the image).

The IBM Cloud Container Registry also includes Vulnerability Advisor (VA) capabilities providing security and compliance introspection of every layer in each image within the user's hosted, private registry. VA scans for vulnerable packages and security configuration settings, security misconfigurations in common applications, malware detection, and administrative control over which images can be deployed based on vulnerabilities.

### 2. Content and Data Protection

The Data Sheet may only be available in English and not available in local language. Despite any practices of local law or custom, the parties agree that they understand English and it is an appropriate language regarding acquisition and use of the Cloud Services. The Data Sheet applicable for this service and the terms of this section provides the details and terms, including Client responsibilities, around use of this service. The following Data Sheet(s) apply to this service.

<https://www.ibm.com/software/reports/compatibility/clarity-reports/report/html/softwareReqsForProduct?deliverableId=69B04E20E24D11E69CCD7F0385C6524D>

### 3. Entitlement and Billing Information

#### 3.1 Charge Metrics

The Cloud Service is offered in accordance with the following charge metric(s):

**Gigabyte Transmitted** – A Gigabyte is 2 to the 30th power bytes. Client will be charged for each full or partial Gigabyte of data transmitted to and from the Cloud Service during the billing period.

**Gigabyte-Month** – A Gigabyte is 2 to the 30th power bytes. Client will be charged for the number of Gigabytes analyzed, used, stored, or configured in the Cloud Service during each month during the billing period rounded up to the next Gigabyte.

### 4. Enabling Software

IBM Cloud Container Registry includes an IBM Cloud (bx/bluemix) cli extension (cr/container-registry).
