

IBM Cloud Additional Service Description

IBM Watson Knowledge Catalog Paygo

Except as noted below, the terms of the IBM Cloud Service Description apply.

1. Cloud Service

1.1 Offerings

The Client may select from the following available offerings.

1.1.1 IBM Watson Knowledge Catalog Paygo

This Cloud Service provides a cloud native solution where users can catalog, govern, and discover information assets, and it is designed to reduce the time spent searching for and hesitating over sharing data. IBM Watson Knowledge Catalog can index the assets already in a data lake and use it to build a 360 view of information by connecting to data on premise and in the cloud. The service also includes fully managed data preparation and movement capabilities that enable data professionals to cleanse, transform, and move data in support of application development and analytic use cases.

2. Data Processing and Protection Data Sheets

The Data Sheet applicable for this service and the terms of this section provides the details and terms, including Client responsibilities, around use of this service. The following Data Sheet(s) apply to this service:

<https://www.ibm.com/software/reports/compatibility/clarity-reports/report/html/softwareReqsForProduct?deliverableId=022E91C059C311E6865BC3F213DB63F7>

3. Service Levels and Technical Support

3.1 Service Level Agreement

The service level agreement set forth in the base IBM Cloud Service Description applies to this service.

3.2 Technical Support

The support terms set forth in the base IBM Cloud Service Description apply to this service.

4. Charges

4.1 Charge Metrics

The charge metric(s) for the Cloud Service are specified in the Transaction Document.

The following charge metrics apply to this Cloud Service:

- Authorized User is a unique user authorized to access the Cloud Services in any manner directly or indirectly (for example, through a multiplexing program, device or application server) through any means.
- Instance is each access to specific configuration of the Cloud Services.
- Capacity Unit-Hour is an hour of use of the selected Cloud Services capacity type that will be multiplied by the specified number of required capacity units for such capacity type.

Client will be charged for the number of whole or partial hours multiplied by the number of Capacity Units Required Per Hour for each Capacity Type, per the pricing plan available in the IBM Cloud UI, that is initiated during the billing period.

Capacity Type	Capacity Units Required Per Hour
1 vCPU and 4 GB RAM	0.5
2 vCPU and 8 GB RAM	1
3 vCPU and 12 GB RAM	1.5

Capacity Type	Capacity Units Required Per Hour
Profiling jobs	6

For the purposes of this Cloud Service, a minimum charge of 0.96 Capacity Unit Hours will apply each time the Capacity Type to run profiling jobs is initiated.

5. Additional Terms

For Cloud Service Agreements (or equivalent base cloud agreements) executed prior to January 1, 2019, the terms available at <https://www.ibm.com/acs> apply.
