

Service Description

IBM Acoustic Insights

This Service Description describes the Cloud Service. The applicable order documents provide pricing and additional details about Client's order.

1. Cloud Service

1.1 Offerings

The Client may select from the following available offerings.

1.1.1 IBM Acoustic Insights

IBM Acoustic Insights enables organizations to use plant and operation sounds to automatically detect anomalies and defects and identify product quality issues. This helps the process of acoustic (sound) inspection for product quality tracking, aids in increased yield and reduced scrap, and reduced human inspection time. Through the use of sound analysis, Client can:

- identify defects in finished products; and
- monitor and track anomalies in in-process products.

2. Data Processing and Protection Data Sheets

IBM's Data Processing Addendum at <http://ibm.com/dpa> (DPA) and the Data Processing and Protection Data Sheet(s) (referred to as data sheet(s) or DPA Exhibit(s)) in the links below provide additional data protection information for the Cloud Services and its options regarding the types of Content that may be processed, the processing activities involved, the data protection features, and specifics on retention and return of Content. The DPA applies if and to the extent the European General Data Protection Regulation (EU/2016/679) (GDPR) applies to personal data contained in Content.

3. Service Levels and Technical Support

3.1 Service Level Agreement

IBM provides the Client with the following availability service level agreement (SLA). IBM will apply the highest applicable compensation based on the cumulative availability of the Cloud Service as shown in the table below. The availability percentage is calculated as the total number of minutes in a contracted month, minus the total number of minutes of Service Down in the contracted month, divided by the total number of minutes in the contracted month. The Service Down definition, the claim process and how to contact IBM regarding service availability issues are in IBM's Cloud Service support handbook at https://www.ibm.com/software/support/saas_support_overview.html.

Availability	Credit (% of monthly subscription fee*)
Less than 99.9%	2%
Less than 99.0%	5%
Less than 95.0%	10%

* The subscription fee is the contracted price for the month which is subject to the claim.

3.2 Technical Support

Technical support for the Cloud Service, including support contact details, severity levels, support hours of availability, response times, and other support information and processes, is found by selecting the Cloud Service in the IBM support guide available at <https://www.ibm.com/support/home/pages/support-guide/>.

4. Charges

4.1 Charge Metrics

The charge metric(s) for the Cloud Service are specified in the Transaction Document.

The following charge metrics apply to this Cloud Service:

- Item is an occurrence of a specific item that is managed by, processed by, or related to the use of the Cloud Service. For purposes of this Cloud Service, an Item refers to a single sound recording file.

4.2 Use Limitations

Definitions:

- **IBM SaaS Artifacts** – means the materials that are listed in the IBM SaaS Artifacts list in the IBM SaaS User guide. IBM SaaS Artifacts are a variety of predefined and preconfigured materials which include, but are not limited to: predictive models; business rules; message flows; business intelligence models, reports, active reports and dashboards; master data management model structure; and the data schema.

Client may use the Cloud Service to modify the IBM SaaS Artifacts or to create new IBM SaaS Artifacts (collectively **Customized IBM SaaS Artifacts**).

IBM SaaS Artifacts and Customized IBM SaaS Artifacts may not be used independently of this Cloud Service.

Client has no obligation of support for Customized IBM SaaS Artifacts. Any Cloud Service warranties are not applicable to the Customized IBM SaaS Artifacts.

The Cloud Service may only be used with IBM Acoustic Insights Data. IBM Acoustic Insights Data is data directly attributable to Client's Items or data that is used to analyze an item including contextual data.

The Cloud Service and its output are not to be relied upon in substitution for the exercise of independent judgment.

Considerations identified by the Cloud Service are suggestions only and do not replace Client's or Cloud Service users' expert judgment. Based on the Cloud Service users' own experience, courses of action not identified by the Cloud Service may exist that should be considered.

The Cloud Service should only be used to assist qualified personnel acting within their areas of competence, and only such persons are permitted to utilize the Cloud Service.

The Cloud Service does not include information on alternative options associated with each suggested option. These options are an important component of a comprehensive plan and should be carefully considered when making decisions.
