

Service Description

IBM Equipment Maintenance Assistant

This Service Description describes the Cloud Service IBM provides to Client. Client means the contracting party and its authorized users and recipients of the Cloud Service. The applicable Quotation and Proof of Entitlement (PoE) are provided as separate Transaction Documents.

1. Cloud Service

IBM Equipment Maintenance Assistant Query brings the power of cognitive computing to equipment maintenance. It allows users to obtain guidance on the repair and service procedures to perform.

The recommended procedures are derived from applying reasoning and cognitive learning to a wide range of structured and unstructured data associated with repairs, maintenance, procedures, and techniques and to identify the best recommendation for each situation.

Since the recommendations are driven from the Client's unique knowledge base, they are customized to the Client's data and processes.

The Cloud Service allows users to query using natural language through the Cloud Service's APIs or through the offering user interface.

2. Content and Data Protection

The Data Processing and Protection data sheet (Data Sheet) provides information specific to the Cloud Service regarding the type of Content enabled to be processed, the processing activities involved, the data protection features, and specifics on retention and return of Content. Any details or clarifications and terms, including Client responsibilities, around use of the Cloud Service and data protection features, if any, are set forth in this section. There may be more than one Data Sheet applicable to Client's use of the Cloud Service based upon options selected by Client. The Data Sheet may only be available in English and not available in local language. Despite any practices of local law or custom, the parties agree that they understand English and it is an appropriate language regarding acquisition and use of the Cloud Services. The following Data Sheet(s) apply to the Cloud Service and its available options. Client acknowledges that i) IBM may modify Data Sheet(s) from time to time at IBM's sole discretion and ii) such modifications will supersede prior versions. The intent of any modification to Data Sheet(s) will be to i) improve or clarify existing commitments, ii) maintain alignment to current adopted standards and applicable laws, or iii) provide additional commitments. No modification to Data Sheet(s) will materially degrade the data protection of a Cloud Service.

Link(s) to the applicable Data Sheet(s):

<https://www.ibm.com/software/reports/compatibility/clarity-reports/report/html/softwareReqsForProduct?deliverableId=27DE72A033BF11E8845013686FEEAB8B>

Client is responsible to take necessary actions to order, enable, or use available data protection features for a Cloud Service and accepts responsibility for use of the Cloud Services if Client fails to take such actions, including meeting any data protection or other legal requirements regarding Content.

IBM's Data Processing Addendum at <http://ibm.com/dpa> (DPA) and DPA Exhibit(s) apply and are referenced in as part of the Agreement, if and to the extent the European General Data Protection Regulation (EU/2016/679) (GDPR) applies to personal data contained in Content. The applicable Data Sheet(s) for this Cloud Service will serve as the DPA Exhibit(s). If the DPA applies, IBM's obligation to provide notice of changes to Subprocessors and Client's right to object to such changes will apply as set out in DPA.

3. Service Level Objective

The service level objectives for this Cloud Service are:

- 99.5% availability outside of regularly scheduled maintenance windows
- Maximum 5 second response time indicating web page activity is occurring

Service level objectives are a goal and do not constitute a warranty to Client. There is no refund, credit, or other remedy available to Client in the event IBM does not meet the service level objectives.

4. Technical Support

Technical support for the Cloud Service is provided via an online problem reporting system. IBM's software as a service support guide available at https://www.ibm.com/software/support/saas_support_guide.html provides technical support contact and other information and processes. Technical support is offered with the Cloud Service and is not available as a separate offering.

5. Entitlement and Billing Information

5.1 Charge Metrics

The Cloud Service is available under the charge metric specified in the Transaction Document:

- Item is a unit of measure by which the Cloud Service can be obtained. An Item is an occurrence of a specific item that is processed by, managed by, or related to the use of the Cloud Service. Sufficient entitlements must be obtained to cover every Item processed by, managed by, or related to the use of the Cloud Service during the measurement period specified in Client's Transaction Document.

For purposes of this Cloud Service, an Item is a query to the Cloud Service.

5.2 Overage Charges

If actual usage of the Cloud Service during the measurement period exceeds the entitlement specified in the PoE, an overage charge will be billed at the rate specified in the Transaction Document in the month following such overage.

Usage that exceeds Client's entitlement will be charged in increments of 100 Items, rounded up to the nearest 100.

5.3 Billing Frequency

Based on selected billing frequency, IBM will invoice Client the charges due at the beginning of the billing frequency term, except for overage and usage type of charges which will be invoiced in arrears.

6. Term and Renewal Options

The term of the Cloud Service begins on the date IBM notifies Client of their access to the Cloud Service, as documented in the PoE. The PoE will specify whether the Cloud Service renews automatically, proceeds on a continuous use basis, or terminates at the end of the term.

For automatic renewal, unless Client provides written notice not to renew at least 90 days prior to the term expiration date, the Cloud Service will automatically renew for the term specified in the PoE. Renewals are subject to an annual price increase as specified in a quote. In the event the automatic renewal is after receipt of an IBM notice of a withdrawal of the Cloud Service, the renewal term will end the earlier of the end of the current renewal term or the announced withdrawal date.

For continuous use, the Cloud Service will continue to be available on a month to month basis until Client provides 90 days written notice of termination. The Cloud Service will remain available to the end of the calendar month after such 90 day period.
